

Schools are workplaces too!

School employees are more likely to get injured on the job than the average California worker.

United for Safety

It takes everyone, working together, to create a safe workplace!

To prevent injuries:

1. Look for hazards in your job and work with others to identify solutions that will work well for you.
Go to www.dir.ca.gov/CHSWC/SASH to find tips and solutions to address common hazards.
2. Report hazards to your district's or school's safety coordinator or to your supervisor. Share your ideas for solutions.
Remember, you have a right to a safe workplace.
